

gut

Stacked bar chart showing the relative abundance of 14 bacterial taxa across 14 samples, divided into two groups by a dashed line. The taxa are color-coded: red, grey, brown, pink, light blue, orange, green, purple, light green, cyan, magenta, dark blue, brown, and green. The y-axis represents relative abundance from 0 to 1.0.

	g_Alivibrio		g_Teleostei
	g_Pseudomonas		g_Streptococcus
	g_Lewinella		g_Haliea
	g_Rubritalea		g_Oceaniserpentilla
	g_Phylobacterium		g_Candidatus_Berkiella
	g_Spongiibacter		g_Antarctobacter
	g_Staphylococcus		g_Polynucleobacter
	g_Oceanibulbus		g_Corynebacterium
	g_Pseudopelagicola		g_Paraglaciecola
	g_Vibrio		Other (<1% mean abundance)
	g_Pseudoalteromonas
